AB - SE9801811 NOVELTY - Information concerning the floor covering, the required cleaning agent and the necessary amount of agent needed is stored on an information carrier located inside the room or connected to the covering. A cleaner uses an instrument to scan the information on the carrier prior to cleaning in order to obtain the cleaning instructions. ELECTRONICS - The information carrier is a barcode sticker, preferably attached to the floor covering, and the instrument is a barcode reader.

- USE - None given.

- ADVANTAGE - Damage caused by the use of the wrong cleaning materials or an incorrect dose of cleaning material is less likely to occur.

- (Dwg.0/0)
